

AMAN MUJAWAR

Aspiring Data Analyst | SQL | Python | Excel | Power BI

Sangli, Maharashtra, India | +91-8530489359 | mujawara8530@gmail.com | github.com/amanmujawar01

SUMMARY

Aspiring Data Analyst and Computer Engineering graduate with hands-on experience in SQL, MySQL, Excel, Power BI, and Python. Skilled in data cleaning, SQL querying, dashboard development, data visualization, and business reporting. Built projects involving CRM sales analytics, HR analytics, sales performance, and loan/NPA analysis. Seeking an entry-level Data Analyst opportunity to apply analytical skills to real-world business problems.

SKILLS

Programming & Analysis: Python (Proficient), NumPy

Database: SQL, MySQL, MySQL Workbench

Visualization: Power BI, Excel, Power Query, Pivot Tables, Pivot Charts

Analytics: Data Cleaning, Data Analysis, Data Visualization, Business Reporting

SQL: Joins, Subqueries, CTEs, Aggregate Functions, GROUP BY, HAVING, Window Functions, RANK, LAG

Power BI: DAX, Power Query, Data Modeling, Interactive Dashboards

Tools: Git, GitHub, VS Code

Currently Learning: AI, Machine Learning, Pandas, Matplotlib

PROJECTS

CRM Sales Analytics — SQL & MySQL

- Analyzed customer, sales, product, and sales pipeline data using MySQL.
- Developed SQL queries using JOINs, subqueries, CTEs, aggregate functions, and window functions.
- Analyzed customer purchasing behavior, sales revenue, product performance, and completed sales.
- Used RANK() and LAG() to identify product rankings and compare monthly sales performance.

HR Analytics — SQL & MySQL

- Analyzed employee, department, performance, attendance, salary, and sales history data.
- Used SQL to evaluate employee performance, attendance, salary trends, and departmental metrics.
- Applied JOINs, CTEs, subqueries, GROUP BY, HAVING, and window functions for analytical reporting.
- Identified patterns in employee performance and workforce-related metrics.

Sales Performance Dashboard — Excel & Power BI

- Developed an interactive sales dashboard using Excel and Power BI.
- Analyzed approximately 3,000 sales records across customers, products, salespeople, regions, and categories.
- Created KPIs and visualizations for sales by region, top products, salesperson performance, and monthly sales trends.
- Used Power Query, DAX, data modeling, Pivot Tables, and Pivot Charts for data preparation and reporting.

Loan & NPA Analytics Dashboard — Power BI

- Built a Power BI dashboard to analyze loan portfolio, customers, disbursement, active loans, closed loans, and NPA performance.
- Created DAX measures and interactive visualizations to monitor key financial metrics.
- Analyzed NPA percentage and loan performance to provide business-focused insights.

EDUCATION

Bachelor of Engineering — Computer Engineering

2026

Vishveshwarya Technical Campus, Dr. Babasaheb Ambedkar Technological University (DBATU) | CGPA: 7.87 / 10.00
